Carbon Slab (Rhossili)	SS 40304 87532	51.563995	-4.305359
Castaway Cove	SS 41002 88072	51.569045	-4.295540
Caswell Bay Far South Slab	SS 58902 87459	51.568295	-4.037212
Caswell Bay Great Slab	SS 58945 87504	51.568715	-4.036611

These pages are a collection of OS grid references and latitude/longitude (WGS-84) for most of the crags on Gower.

The latitude/longitude for each crag was collected using a basic hand-held GPS receiver. The OS grid references were generated via OSTN15 transformation. You will notice that the grid references are 10 figures; this means they are (in theory) accurate to around 1 metre.

The grid reference should point you quite close to the crag (usually the bottom of the crag), but sometimes the top.

Use them this way; taking **Barland Quarry** as an example:

Barland Quarry is **SS 57515 89481**

Rounding where necessary, think of it as:

**SS 57515 89500**

or **SS 575 895**

This six figure grid reference is accurate to within 70 metres (or so) and good enough to get you to the crag.
